CAPSTONE PROJECT

Project Title

Voting Application using Django Framework- MAGESWARAN.R(4034,AEC)

Abstract | Problem Statement | Project Overview | Proposed Solution |
Technology Used | Modelling & Results | Conclusion

ABSTRACT

The Django framework, assures a solid and scalable base. The web-based architecture of the proposed voting application enables users to establish and take part in online votes. The Django framework, a well-liked and robust Python-based web framework that offers a solid foundation for creating scalable and secure online applications, is used in the construction of the application. Along with being scalable and adaptable, the program has a modular architecture that makes modification and extension simple. Because of this, it may be applied to a variety of use cases, ranging from intimate internal voting to extensive public elections. All things considered, the suggested voting application provides a safe, convenient, and adaptable online voting platform. Its emphasis on security and user experience, along , making it an excellent and provides a better security to web applications.

PROBLEM STATEMENT

With more organizations and governments using digital platforms to hold elections and surveys, online voting has grown in popularity in recent years. Online voting does, however, come with a number of drawbacks, mostly with regard to security and integrity. The suggested voting application aims to tackle the issues of security and integrity in online voting, while simultaneously offering an intuitive platform for conducting votes online. Its emphasis on security and user experience, along with its usage of the Django framework, will make it an excellent option for a variety of voting scenarios. The program will emphasize user experience in addition to security, with a clear and simple interface that makes it easy for users to create and participate in votes. The application will support multiple types of votes, including single-choice and multiple-choice votes, and will allow users to set deadlines and restrictions for each vote.

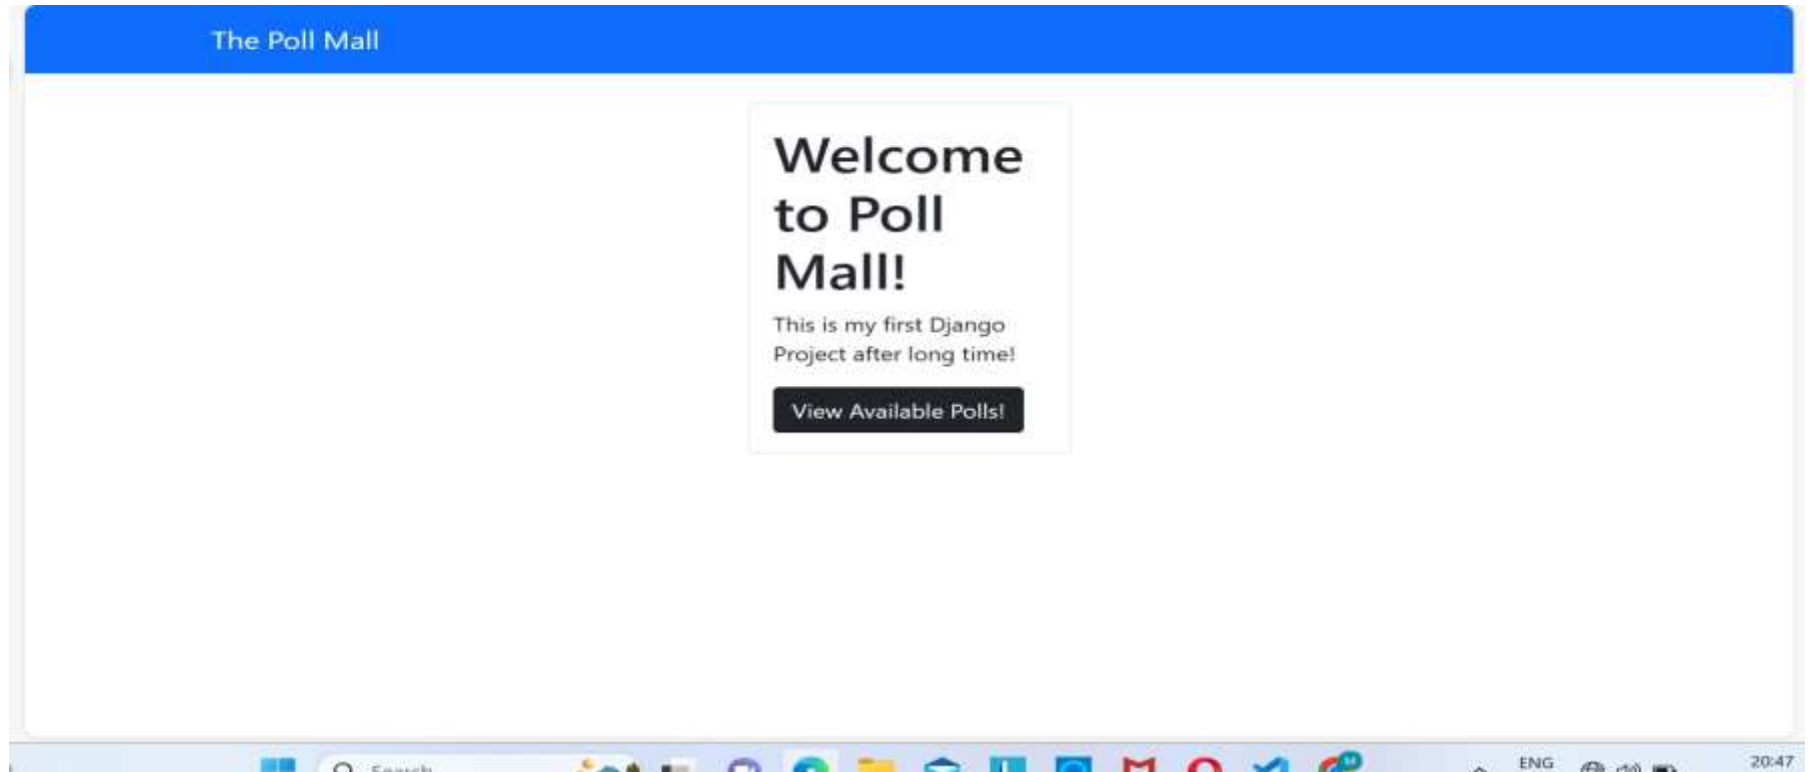

PROJECT OVERVIEW

- 1.Establishing a Django Project:** To provide the framework for the voting application, create a Django project.
- 2.Creating the Database Schema:** Establish the framework for the database that will hold user data, vote tallies, and other pertinent information.
- 3.Establishing User Authentication:** To enable users to sign up, log in, and take part in voting, implement user authentication.
- 4.Creating the Voting Interface:** Create the user interface that allows users to browse options, make selections, and cast ballots.
- 5.Putting Real-time Results into Practice:** Present the voting results in real-time to give users immediate feedback.
- 6.Creating an Admin Panel:** To efficiently manage the candidates, user accounts, and voting process, create an admin panel.

DETAILED SOLUTION

Developing a safe and user-friendly online voting platform is the suggested solution for a voting application built with the Django framework. Users of the app will be able to register, cast ballots, and see the results in real time. The Django framework will serve as the cornerstone for developing the application because of its scalability and resilience. In order to manage elections, candidates, and user accounts effectively, the program will feature an admin panel, a secure database, real-time results, and an easy-to-use interface. In conclusion, the Django framework-based voting application that has been suggested offers a safe, adaptable, and user-friendly online voting platform. Its emphasis on security and user experience, along with its use of the Django framework, assures a solid and scalable base, making it an excellent ideal choice for a wide range of voting scenarios.

ADMIN LOGIN PAGE

The screenshot shows a web application interface for 'The Poll Mall'. At the top, there is a dark blue header bar with the text 'The Poll Mall' in a light green font, followed by a small white circular icon containing a black 'i'. Below the header, the login form is centered on a white background. It consists of two text input fields: the first is labeled 'Username:' and contains the text 'ARAVINTH.B'; the second is labeled 'Password:' and contains seven asterisks. Below these fields is a dark blue rectangular button with the text 'Log in' in white.

ADMIN HOME PAGE

The screenshot displays the 'The Poll Mall' admin interface. The top navigation bar is teal with the title 'The Poll Mall' on the left and user information 'WELCOME, **MAGESWARAN.R** VIEW SITE / CHANGE PASSWORD / LOG-OUT' on the right. A vertical sidebar on the left contains icons for home, documents, and a plus sign. The main content area is white and features a welcome message 'Welcome to our Voting Admin Area'. Below this, there are two primary sections: 'AUTHENTICATION AND AUTHORIZATION' and 'POLLS'. The 'AUTHENTICATION AND AUTHORIZATION' section includes 'Groups' and 'Users' with 'Add' and 'Change' links. The 'POLLS' section includes 'Questions' with 'Add' and 'Change' links. On the right side, there are two panels: 'Recent actions' and 'My actions'. The 'My actions' panel lists five questions related to Django, each with a green plus icon and the word 'Question' below it. A vertical toolbar on the far right contains various icons for navigation and settings. The bottom of the image shows a Windows taskbar with the Start button, a search bar, and several application icons. The system clock in the bottom right corner shows the time as 20:39 and the date as 11-04-2024.

AUTHENTICATION AND AUTHORIZATION PAGE

The screenshot displays the 'VOTING AREA' interface. At the top, a navigation bar includes 'WELCOME, SHAHUL', 'VIEW SITE', 'CHANGE PASSWORD', and 'LOG OUT'. Below this, a breadcrumb trail reads 'Home > Authentication and Authorization > Users'. The left sidebar contains a menu with 'AUTHENTICATION AND AUTHORIZATION' (expanded), 'Groups', 'Users', 'POLLAPP', and 'Questions'. The main content area is titled 'Select user to change' and features a search bar, an 'ADD USER' button, and a table of users. The table has columns for 'USERNAME', 'EMAIL ADDRESS', 'FIRST NAME', 'LAST NAME', and 'STAFF STATUS'. Two users are listed: 'Hameed' and 'shahul', both with email addresses ending in '@xyz.com' and a green status icon. Below the table, it indicates '2 users'. On the right, a 'FILTER' panel offers options to 'Show counts', 'By staff status' (All, Yes, No), 'By superuser status' (All, Yes, No), and 'By active' (All, Yes).

QUESTIONS ADDING SECTION PAGE

The screenshot displays the 'The Poll Mall' web application interface. The top navigation bar includes the site name and a user welcome message: 'WELCOME: **MAGESWARAN.R.** VIEW SITE / CHANGE PASSWORD / LOG OUT'. Below this, a breadcrumb trail shows 'Home > Polls > Questions'. A left sidebar contains a search bar and two main categories: 'AUTHENTICATION AND AUTHORIZATION' (with sub-items 'Groups' and 'Users', each with an 'Add' button) and 'POLLS' (with a 'Questions' sub-item and an 'Add' button). The main content area is titled 'Select question to change' and features an 'ADD QUESTION +' button. It lists five questions, each with a checkbox and an 'Action' dropdown menu. The questions are: 'QUESTION', 'Which one will describe the django structure?', 'What is the use of the render in django?', 'what is the use of urls.py in django?', and 'Which command is used to create django app?'. Below the list, it indicates '5 questions'. The bottom of the image shows a Windows taskbar with various application icons and a system tray with the date '11-04-2024' and time '21:43'.

VOTING DETAILS PAGE

The screenshot shows a web application interface for managing a poll. The top navigation bar includes links to Home, Pollapp, Questions, and the current question: "Django is written in which language?". A left sidebar contains a search bar and two main sections: "AUTHENTICATION AND AUTHORIZATION" with links to Groups and Users, and "POLLAPP" with a link to Questions. The main content area is titled "Change question" and features a "HISTORY" button. Below this, the "Question text" is "Django is written in which language?". A "Date Information (Show)" section is present. The "CHOICES" section displays a table with three rows: C++, Python, and AngularJS, each with a "VOTES" column and a "DELETE?" column.

CHOICE TEXT	VOTES	DELETE?
C++	4	<input type="checkbox"/>
Python	10	<input type="checkbox"/>
AngularJS	6	<input type="checkbox"/>

CONCLUSION

A good understanding of HTML, CSS, Bootstrap, Django, and Python programming to design a voting application using Django. The development process entails starting a fresh Django project, building a Django application, specifying models, views, templates, and locations. Features like a user-friendly interface, a secure database design, and real-time results can further improve the program. An admin panel for controlling elections, candidates, and user accounts may also be included. All things considered, a voting application built using the Django framework is a strong and adaptable way to build online voting systems that meet different needs and use cases.
